INSTRUCTIONS FOR

Patient Cabinet w/Keypad (#3787)

NOTE: Be sure to select the appropriate mounting hardware to ensure safe and reliable use. Mount hardware through a stud, blocking or rigid structure where possible during installation.

CAUTION: Do not keep the keys inside the safe itself!

Opening the safe
Step 1. Enter the user code 159, the yellow light will light up.
Step 2. Press the A or B button, the green light will light up. Turn the knob and pull out; the door is now open.

Closing the safe
Step 1. Close the door and turn the knob to the left to lock the safe.

Changing your code
Step 1. Open the safe.
Step 2. Press the red reset button on the inside of the door and the yellow light will light up indicating the user code is ready to be changed.
Step 3. Enter your new user code
Step 4. Press the A or B button, two beeps will sound confirming the change. (If a yellow light flashes and three beeps sound, your code is invalid and you must repeat the process.)

Emergency safe access
Step 1. Remove the override cover in the middle of the safe.
**Step 2.** Insert the override key.
Step 3. Turn the key to the left then turn the knob to the right to open the safe.

Installing/Replacing the battery
If the batteries are low, the red light at the top of the number panel will light up.
The safe requires 4 AA (1.5V) Batteries.
Open the safe, push the battery cover plate on the back of the door and install the batteries. Ensuring the batteries are fitted with the correct polarity.
