ASSEMBLY INSTRUCTIONS FOR Sink Cabinet (#5047)

Step 1. Lay the back panel flat on the floor. Bring the top panel into position.

Step 2. Attach the top panel by aligning the pre-drilled holes with the connection fittings in the back panel. Push the two panels together. Once together, press the fitting toggles down to secure.

Step 3. Locate the bottom panel and position at the bottom of the back panel. Attach the bottom panel by inserting the connection fittings in the bottom panel into the pre-drilled holes in the back panel. Push the two panels together.

Step 4. Once together, press the fitting toggles down to secure.

Step 5. Locate the toe panel and attach to the bottom panel by inserting the connection fittings into the pre-drilled holes in the bottom panel.

Step 6. Once the toe and bottom panels are together, press the fitting toggles down to secure.

ASSEMBLY INSTRUCTIONS FOR Sink Cabinet (#5047)

Step 13. Once sides are attached your cabinet unit should look like this. With assistance, raise your unit to the upright position.

Step 14. Once hinges are in place and flush against doors, press down on the screw cover plates to secure hinges to doors.

Step 15. Your doors should look like the photo above when hinges are attached.

Step 16. Doors are ready to be attached. Position the left door onto the side of the cabinet unit. The hinges should align with pre-installed hinge plates mounted inside of the unit.

Step 17. Attach the hinges to the hinge plates by guiding the hooked area of the hinges around the small posts on the hinge plates and pressing them to the plates until they latch.

This step can be tricky and may take a few attempts to get the hinges to latch. Once the left door is attached repeat steps 16-17 for the right door.
